

Sales Performance Analysis

Prepared for Alfido Tech — InternSpark Data Analytics Internship, Task 2

Dataset: Kaggle – Superstore Sales | Author: Adarsh Priyam

Executive Summary

This report analyzes 9,800 Superstore sales orders (Jan–Dec 2018) across 4 regions, 3 product categories, and 3 customer segments for Alfido Tech. Total revenue for the period was **\$2.26M** from **5,009 unique orders** and **793 customers**, with an average order value of **\$451**. The West and East regions drive 61% of total revenue. Technology leads in per-order value, while Office Supplies drives volume. A strong Q4 seasonality pattern is evident — Q4 revenue is roughly 2.5x Q1. Five tactical recommendations are provided covering regional investment, segment growth, product focus, and fulfilment improvement.

1. Key Performance Indicators

KPI	Value
Total Revenue	\$2,261,537
Total Orders	5,009
Unique Customers	793
Average Order Value	\$451
Average Days to Ship	3.9 days

2. Regional Performance

The **West** region leads with ~31% of total revenue, followed closely by **East** (~30%). **South** contributes ~21% and **Central** trails at ~18%, representing the clearest opportunity for targeted investment.

Region	Revenue (\$)	Orders	Customers	AOV (\$)	Revenue Share
West	701,008	1,560	502	449	31.0%
East	678,781	1,520	508	447	30.0%
South	471,760	1,076	390	438	20.9%
Central	409,988	853	296	481	18.1%

Figure 1. Revenue by Region — West and East together account for 61% of total revenue.

3. Category & Sub-Category Analysis

Technology leads in total revenue (36.4%) and highest average sale value, driven by high-ticket sub-categories like Copiers and Machines. **Furniture** (32.3%) has fewer but large orders, while **Office Supplies** (31.3%) drives volume at lower per-order values. Phones, Chairs, and Storage are the top 3 sub-categories by revenue.

Figure 2. Revenue share by category — Technology leads slightly, with Furniture and Office Supplies close behind.

Figure 3. Top 10 sub-categories by revenue — Phones, Chairs, and Storage lead the list.

4. Seasonality & Time Trends

Revenue shows a clear upward trend through the year, with Q4 being by far the strongest quarter at ~\$871K — nearly 2.5x Q1 (\$351K). This suggests significant holiday and year-end purchasing behaviour that Alfido Tech should actively plan inventory and marketing around.

Figure 4. Monthly revenue trend — strong acceleration from Q3 into Q4.

Figure 5. Quarterly revenue — Q4 dominates at 38.5% of annual revenue.

5. Customer Segments & Regional Category Mix

Consumer accounts for 50.8% of revenue but has the lowest average order value (\$225). **Corporate** (30.4%) and **Home Office** (18.8%) buyers spend more per order (\$233 and \$243 respectively), making them higher-efficiency revenue sources to grow.

Figure 6. Revenue by customer segment — Consumer dominates by volume, Corporate by per-order value.

Figure 7. Revenue heatmap by Region and Category — West/Technology is the highest single cell.

6. Top Products

The top 10 products are dominated by high-value Technology and Furniture items. A small number of products (Copiers, high-end chairs, large printers) contribute disproportionately to revenue — retaining customers who buy these items is critical.

Figure 8. Top 10 products by revenue — Technology items lead significantly.

7. Tactical Recommendations for Alfido Tech

1. Invest marketing in West & East ahead of Q4

These two regions drive 61% of revenue and Q4 is the strongest quarter (~38% of annual sales). Targeted promotions launched in Aug–Sep can prime the pipeline before the year-end surge.

2. Grow Corporate and Home Office segments

Despite smaller headcounts, these segments have higher average order values. B2B-focused campaigns, bulk discounts, and dedicated account managers can lift revenue without proportionally increasing order volume.

3. Revive the Central region

Central contributes only 18% of revenue despite being a major geography. Pilot a region-specific campaign with discounted shipping or category bundles to diagnose whether this is a product fit or marketing gap.

4. Double down on Technology — especially Copiers and Machines

These sub-categories have the highest per-order revenue. A small improvement in win rate for large deals has outsized impact on total revenue; dedicated sales support or financing options could help close more.

5. Reduce Standard Class ship times

Standard Class is the most common ship mode. Shaving even 1–2 days off delivery for frequent Consumer segment buyers is a proven driver of repeat purchases and can meaningfully improve retention rates.
